Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ziperstein et al (1228159) in view of Bassett (1633238), Bothe (5823468) and JP Aerospace Flight.

Ziperstein et al (1228159) shows a airship with multiple balloons and wings and means for transferring gas from balloon to balloon. Bassett (1633238) teaches that gas can be transferred from balloon cell to cell via a pump and a tank to better control the buoyancy. Bothe (5823468) teaches that an airship with wings can pivot the wings with propulsion means on them to enhance the lift of the airship wings. JP Aerospace Flight teaches that it is know to use airship to lift a rocket to a higher orbit and than release it to launch it into outer space. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Ziperstein et al with pivoted wings with propulsion as taught by Bothe since it will enhance the lift of the airship wings, and to further use a pump and tank to control buoyancy as taught by Bassett to better control the buoyancy and to further launch a rocket from it as taught by JP Aerospace Flight since they teaches that it is know to use an airship to lift a rocket to a higher orbit and than release it to launch it into outer space.

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is noted that the language of claim 2 has not been properly correlated with that of claim 1, for example, the tank etc.

Drawings

1. The drawings have been approved.
2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
